HOME SCHOOL PROGRAM

Join us

Looking for an educational adventure for your homeschooler?

Join us on a hands-on journey into the world of Native Australian Wildlife! Through education, science, and art, participants will not only meet some of our fascinating creatures up close but also learn how they can help protect our local wildlife.

Our sessions are inclusive, engaging, and designed for all abilities—perfect for creating a meaningful and exciting experience.

Our Program

- Each week, we explore a different animal, discussing various topics including anatomy, adaptations, habitat, life cycles, threats, and how we can help ensure their well-being.
- Participants will engage in a comprehensive learning experience through PowerPoint presentations, science experiments, hands-on activities, and art, providing a well-rounded understanding of each subject.

Discover the Wonders of Australia's Unique Animals!

Join us for an engaging homeschool program where students dive into the fascinating world of Australian native wildlife through interactive learning, exciting science experiments, and creative art projects!

Program Highlights:

Informative Sessions: Learn about iconic and lesser-known Australian animals, their habitats, and their roles in the ecosystem.

Hands-on Science Experiments:

Explore animal adaptations, build mini-ecosystems, and discover food chains through fun, educational experiments.

Creative Art Projects:

Bring wildlife to life with animal sculptures, habitat dioramas and nature journals.

Conservation and Awareness:

Understand the importance of preserving Australia's unique wildlife and ecosystems.

Who Can Join?

Perfect for primary aged students who have a passion for nature, animals, and the environment.

Why Join?

Foster a love for nature and wildlife
Hands-on learning in science and art
Develop awareness of conservation and sustainability
Fun, interactive, and educational!
